Good afternoon, Venice Beach (VB).

I'd like to take a look at the following listed records. Ifor emails, I need to see these in their native format, which means one of .eml, .msg, .mbox, or .pst. I will also need to see all attachments to emails in their own native format. If you supply the emails in the above-listed formats the attachments are included automatically.

1. All communications, including but not limited to email, between anyone at the VBID and anyone at the City of Los Angeles, including but not limited to the Clerk's office, COLL, and the LAPD.
2. All communications, including but not limited to email, between anyone at the VBID and anyone at Devine Strategies, including subcontractors, e.g. Ed Henning and any whom about whom I don't know.
3. All intra-board communications that relate to the business of the VB.
4. All records relating to the VBID's choice of a security provider.

As I don't know whether or not you all have chosen one, I can't be too specific. If you have not I'd like to see all communications, RFPs, proposals, and so on. If you have, I'd like to see all that same stuff plus contracts, training materials, MOUs, etc.

Thanks in advance for your help and cooperation.
